DETAILED ACTION

Applicants' amendments and remarks submitted March 4, 2004 have been entered and considered. The amendments and remarks are persuasive to overcome the rejections set forth in the prior office action. Particularly, the claims, as amended, are directed to treating a subject in need of suppressing or ameliorating one or more symptoms listed therein, which are associated with premenstrual syndrome. It is noted that Fuji teaches a method of treating stress with the same therapeutical agent herein. However, the stress disclosed in Fuji are mental stress, which are normally treated with anti-anxiety drug. Particularly, Fuji shows the theanine suppressing the increment in the heart rate and blood pressure under stress conditions. There is no teaching or suggestion that theanine would be useful for treating symptom associated with premenstrual syndrome as herein listed. Further, it is understood that not every anti-anxiety drug would have been expected to achieve the results shown in examples 5-7 herein. At best it is a situation of obvious to try, which is not a standard of obvious rejections.
